

Provider & Stakeholder Questions and Answers (Q&A)

Updated: 2021-04-01 | **SUBJECT TO CHANGE**

Topic	Question	Response
<i>Partners in Care – Vaccination Updates</i>	How do I get in contact with Partners in Care if I want to coordinate vaccination services for the population that I work with?	Please call (808) 380-9444 or e-mail laurat@partnersincareoahu.org . You can also visit the Partners in Care website at https://partnersincareoahu.org .
<i>Partners in Care – Vaccination Updates</i>	I know keeping track of documents can be a challenge. Is there a way to provide vaccination status if a person loses their vaccination card?	We are dealing with this right now. We have put into HMIS some COVID related questions, so people can state where they got tested, when they got tested, where they got vaccinated, and the date of the vaccination. For those providers who are working with clients who are in the process of getting vaccinated, please work with the client to get their consent to upload the vaccination card to HMIS. Partners in Care will also be working with Project Vision Hawaii to get a copy of the vaccination card so they can upload this to HMIS with consent. This is critical so that the lack of proof of vaccination does not become a barrier that prevents individuals from accessing shelter or housing.
<i>Partners in Care – Vaccination Updates</i>	With vaccination information being Protected Health Information (PHI), do they need another consent for their vaccine card to be uploaded into HMIS?	Project Vision Hawaii has a consent that includes HMIS and will allow for vaccination cards to be scanned and uploaded into HMIS.
