Between 2016 and 2022, the number of children experiencing homelessness declined 55% statewide, reflecting 1,073 fewer children experiencing homelessness – During this same period, Oahu saw a 56% decrease in child homelessness (707 fewer families), and the neighbor islands saw a 53% decrease in child homelessness (366 fewer families).

### Housing Inventory Count

HUD also requires CoCs to submit a Housing Inventory Count (HIC) of the number of emergency shelter, transitional shelter, and permanent housing resources available for persons experiencing homelessness or in permanent supportive housing. Similar to the PIT count, the HIC is usually conducted during the last ten days in January – in 2022, due to the changing circumstances related to the COVID-19 pandemic, Bridging the Gap conducted the HIC in January and Partners in Care conducted the HIC in March. The HIC reports tally the number of beds and units available on a specific night designated by program type. The chart below includes statewide HIC numbers from 2005 to 2022. The HIC over this time period reflects a shift in composition from primarily short-term resources to a growing number of longer-term housing resources in more recent years.

To view a breakdown of the HIC specifically for different categories, click on the links below:

# Targeting and Prioritization

For our programs, income and assets are *not required* for eligibility

*However, priority is given to those with:*

*Greatest economic and social need, at risk for institutionalization, low-income, minority with limited English proficiency, and/or residing in rural areas.*

- A person's position on the waitlist is based on how needy the person is in comparison to the others on the waitlist. It is not first-in, first-out.
- Elder needs are increasing and demand continues to outpace funding, so those with the lowest priority scores will probably never be served by us.
- Therefore, all options need to be considered, including non-informal supports, government programs, & private-pay.
